LIN HTET PAING

FULL STACK DEVELOPER | SOFTWARE ENGINEER (LARAVEL & VUE.JS)

painglynn181@gmail.com • (+95) 9455178566
Bangkok, Thailand • Yangon, Myanmar
GitHub • LinkedIn • Portfolio

PROFESSIONAL SUMMARY

Full Stack Developer with over 7 years of experience designing, developing, testing, and maintaining scalable web applications using **Laravel, Vue.js, React, NestJS, and Go (Golang)**. Proven track record of taking end-to-end ownership of features from concept through production delivery within regulated, safety-critical environments including **fintech (mobile wallets, Stripe)** and **insurance systems**. Strong advocate for clean, testable, and maintainable code utilizing **SOLID principles, Domain-Driven Design (DDD), and Test-Driven Development (TDD)**. Experienced in building data-driven solutions, integrating OCR/AI pipelines, optimizing SQL and NoSQL databases, and collaborating across cross-functional teams to solve complex real-world problems.

TECHNICAL SKILLS

Core Languages & Frameworks: PHP (Laravel, FilamentPHP, FuelPHP), JavaScript/TypeScript (Node.js, NestJS), Vue.js (Vuex), React (Redux, Zustand, Jotai), Go (Golang), Java, HTML5, CSS3, TailwindCSS.

Back-End, Architecture & APIs: RESTful APIs, Microservices, GraphQL, gRPC, Gin, Strapi CMS, SOLID Principles, Design Patterns, System Architecture, Spec-Driven Development (SDD).

Databases & Data Technologies: MySQL, PostgreSQL, MongoDB (Mongoose), Redis, Database Schema Optimization, Data-Driven Pipelines (Python 3, OCR, RAG, InsightFace).

Testing, Quality & DevOps: Unit & E2E Testing (Jest), Test-Driven Development (TDD), Code Reviews, CI/CD, Docker, Git, AWS (EC2, S3), Nx Monorepo, Technical Documentation.

Methodologies & AI Engineering: Domain-Driven Design (DDD), Agile/Scrum; AI Coding Tools (Claude Code, Codex, Opencode, Antigravity).

PROFESSIONAL EXPERIENCE

Onenex • Software Engineer
Feb 2024 – Present | Yangon, Myanmar

- **Full Stack Application Development:** Designed, developed, tested, and maintained responsive internal HRM and Social applications using **Laravel and Vue.js**, taking end-to-end ownership of features from development through delivery.
- **Scalable Systems & Regulated Fintech:** Built a high-performance mobile wallet payment platform using **NestJS, Strapi, PostgreSQL, and Microservices**, ensuring reliable APIs and seamless communication across distributed systems.
- **UI/UX & Stakeholder Collaboration:** Collaborated closely with web designers and product stakeholders to deliver intuitive user interfaces and dynamic landing websites using Vue.js and Strapi CMS.
- **Performance Optimization & Scalability:** Spearheaded the architectural migration of a PHP/Vue social web application to a modern NestJS backend within an **Nx monorepo**, resolving performance bottlenecks and improving system maintainability.
- **Code Quality, Testing & Mentorship:** Led and mentored junior developers, conducting rigorous code reviews, enforcing unit testing (Jest) and CI/CD standards, and maintaining clear technical documentation.

Prithibi Consulting and Development Services • Full Stack Developer (Freelance)
Nov 2023 – Jan 2024 | USA (Remote)

- **Full Stack Solutions:** Developed, tested, and maintained critical billing and automated notification systems end-to-end using **Laravel, Vue.js, and MySQL**.
- **Workflow Automation & Integration:** Engineered a custom web agent utilizing **Microsoft Power Platform and JavaScript** to automate complex client workflows and improve operational efficiency.

Alpha Sirius • Full Stack Developer
Jan 2022 – Oct 2023 | Singapore (Remote)

- **Secure E-Commerce & Payment Systems:** Developed a digital ordering and e-commerce platform using **Laravel and React**, integrating **Stripe** for strict data protection and reliable payment processing.
- **Clean Architecture & Maintainability:** Applied SOLID principles and software design patterns to architect a clean, well-structured, and maintainable administrative interface using **FilamentPHP**.

Meta Team Myanmar (formerly Seattle Consulting) • Senior Web Developer
Oct 2019 – Nov 2022 | Yangon, Myanmar

- **Regulated Systems Migration & Database Optimization:** Led the successful migration of **7 core insurance sub-systems from FuelPHP to Laravel**, refactoring legacy codebases and optimizing SQL database schemas for faster data retrieval.
- **Cross-Functional International Collaboration:** Developed employee management and compliance training systems for the Japanese market, communicating technical concepts clearly across multicultural engineering and product teams.

DATA-DRIVEN & FEATURED PROJECTS

- **Information Management System (IMS) – AI & Data Pipeline:** Developed an enterprise project and product certification system using FilamentPHP. Integrated Python 3 facial recognition (InsightFace) and implemented a Retrieval-Augmented Generation (RAG) assistant.
- **HR Timesheet & Automated OCR System:** Built an HR timesheet platform in FilamentPHP featuring Optical Character Recognition (OCR) to automatically extract and validate structured passport data into user forms.
- **WiFi Management Portal & NLP Chatbot:** Built network authorization via FreeRADIUS/MikroTik routers; engineered a natural language processing chatbot supporting Burmese script.

EDUCATION & CERTIFICATIONS

Bachelor of Computer Science • University of Computer Studies, Yangon (2014 – 2019)

• Neural Networks & Deep Learning (Coursera • DeepLearning.AI) • NestJS: Complete Developer's Guide (Udemy)

• Learn Go (Boot.dev) • Front-End Development (Coursera • Meta) • Programming with JavaScript (Coursera • Meta)

• Version Control (Coursera • Meta)
